THANKS

Every publication bears the stamp of a small number of key individuals who have been responsible for a multitude of daily decisions involved in the production process. Marilyn Barriault, Susan Schreifels, Julia Schreifels, Sue Becker, and Lonnie Kennedy have been our key people. We are sincerely grateful for their dedication.

Indeed, it is a humbling process to assemble the list of individuals who helped us with this edition of the Minnesota Data Book (and our apologies to those we might have inadvertently omitted). We could not have done it without you. Thanks!

INTRODUCTION

Information in the Minnesota Data Book has been compiled from a variety of sources. In areas where two or more sources provide conflicting statistics, we have selected what we consider to be the most reliable or appropriate data.

The time lag in the publication of government statistics is a constant problem for all data users. Every single table and chart in this book uses the most current data available at the time this book went to press on April 19, 1985. In some cases, the information in the 1983-1984 edition is still the most current and thus is repeated. Unless otherwise noted, all statistics are for the State of Minnesota or for areas within the state. In some cases, column totals and numerical amounts may not add exactly because of independent rounding.

Your comments and criticisms are welcome and encouraged. We incorporated into this edition many of the suggestions you made in the past year and feel this edition is that much better because of them. Send your comments to:

¹Net migration is the excess of in-migrants over out-migrants or vice versa.

²New estimate not available

³The number of net migrants is the difference between expected population based on survival rates, and the actual census population. Expected population is an estimate of population if no one moved and population changed only because of births and deaths.

⁴The net migration rate is the number of net migrants per 100 expected population.

¹ Nursing Board began a 2-year, "fiscal year" registration system for RN's with the renewal period starting August 1, 1978 and expiring July 31, 1979. Some RN's began their 2-year renewal cycle with the odd year beginning August 1, 1979 and expiring on July 31, 1981. LPN's started a similar even-odd, staggered, 2-year system January 1, 1982 with the difference being a "calendar year" cycle.

² Current registrations as of January 1, 1985.

³ Current registrations as of November 1, 1984. Registrations on January 1, 1985 were available but because renewals occur over a few months, the total was artificially low.

Alaska	Kansas	New Mexico	Rhode Island
Arizona	MINNESOTA	New York	South Dakota
Connecticut	Nebraska	North Dakota	Wyoming
Delaware	New Hampshire	Oregon	
Hawaii	New Jersey	Pennsylvania	

¹ Need Standard - The need standard represents the state's determination of the minimum monthly income which a family requires to obtain shelter, food, clothing, utilities, and other necessities. Although states are required by federal law to honestly set the need standard within the state, the state is not required to pay benefits at 100% of need.

Payment Standard - The payment standard represents the level of assistance authorized by the state for families of a given size and composition. Each state sets its own level of assistance payments for eligible AFDC families residing within the state.

² Grant is based on number of children only.

³ Represents payment levels November-April.

MINNESOTA TRAVEL FACTS

1. U.S. travelers spent more than \$4.4 billion in Minnesota during 1983, 11.4 percent more than in 1982.
2. These expenditures directly generated just over 111 thousand jobs within the state, 6.5 percent of total state nonagricultural employment.
3. Employees in these jobs earned \$951 million in wage and salary income.
4. Traveler spending also generated \$234 million in state tax revenue, approximately 5.4 percent of all state tax collections in 1983.
5. Local tax revenue generated by travel spending totaled 36 million in 1983.
6. Minnesota's travel-generated employment rose 7.2 percent in 1983, compared to a 0.4 percent increase in total state nonagricultural employment.
7. Travel expenditures averaged \$51 million per county in Minnesota, and all 87 counties benefited from this spending.
8. Hennepin county, including the city of Minneapolis, received \$2.2 billion in travel expenditures to lead all Minnesota counties.

¹BTU figures based on unrounded physical unit numbers.

²Total fuel oil represents the sum of distillate, jet fuel and residual fuel oils.

³Net import or export of electricity is the difference between the amount of energy in electricity sold within a state (including associated losses) and the energy input at the electric utilities within the state. A positive number indicates that more electricity came into the state than went out of the state during the year;

conversely, a negative number indicates that more electricity went out of the state than came in. A net import of electricity is represented by a positive number, while a net export is represented by a negative number. The BTU value represents the primary energy used in the generation of the net import or export of electricity.

4 All 1993 data is preliminary and subject to revision.

5 Petroleum data represents the product supplied to Minnesota licensed distributors rather than actual consumption by end users.

6 Hydro includes power produced by utilities and private industrial companies.

NOTE: Due to independent rounding, individual fuel sums may not add to total.

Electric End Use		

*Conversion values used in this report represent BTU of energy required to replace a KWH of electricity produced from wind or hydro power with a KWH produced from a base load, coal fired power plant. It should also be noted that hydro is sometimes considered a traditional fuel and sometimes as alternative fuel.

PUBLIC SAFETY

*Larceny (theft) is the taking of the personal property of another with the intent to permanently deprive that person of ownership. Larceny figures will include all those offenses in which a theft (also attempted situations) occurred regardless of monetary loss assigned the stolen property.

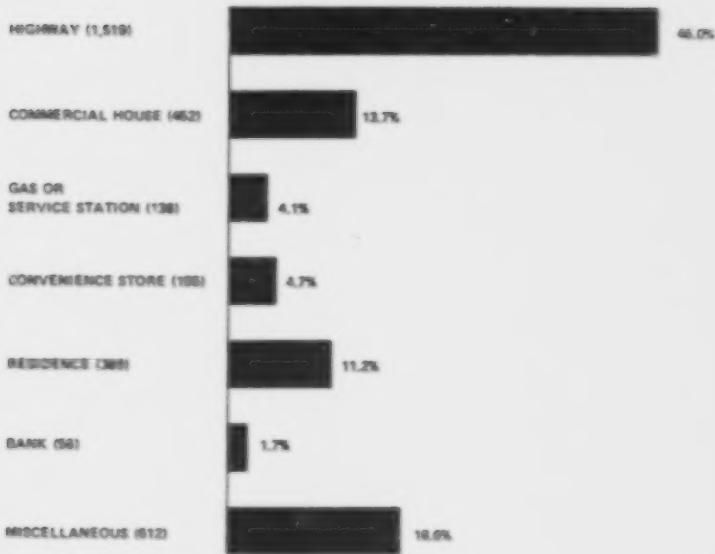

PUBLIC SAFETY

*Robbery involves the felonious & forcible taking of the property of another against that persons will, by violence or by placing the person in a state of fear. The crime of robbery necessitates that a victim be present in order for it to be so classified. As a general rule, robbery differs from larceny in that it is aggravated by the threat & element of force. An attempt to commit a robbery, either armed or strong arm is counted as if the actual offense did occur.

NUMBERS OF BURGLARIES* IN MINNESOTA, 1983

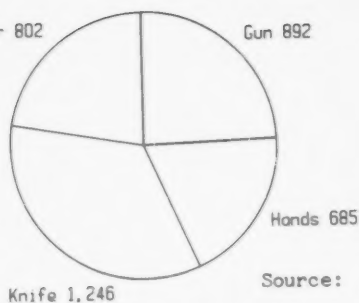

*Burglary consists of the unlawful entry or attempted forcible entry to a structure to commit a theft or felony, even though no force may have been used to gain entry. Burglary is divided into three separate classes:

- A. Forcible Entry
- B. Unlawful Entry - No Force
- C. Attempted Forcible Entry

PUBLIC SAFETY

*
TYPES OF AGGRAVATED ASSAULTS IN MINNESOTA, 1983
TOTAL = 3,625

Source: 123

*Aggravated assault involves an attempt or offer with unlawful force or violence to do physical injury to another. An aggravated assault may be committed by a gun, knife or cutting instrument, other dangerous weapons such as clubs, or through the use of hands, fists or feet. Assault with intent to commit murder is also listed as aggravated assault. All assaults where no weapon is used, which result in minor injuries are classified as non-aggravated assaults or simple assaults and are not counted in the crime index total.

LEGAL REPRESENTATION 1983 JUVENILE PETITIONS

<u>Court Activity</u>	<u>Juveniles Without Attorney*</u>
Reference hearing	20%
Adjudication where disposition is to correctional facility or group home	28%
Burglary adjudication	45%
Delinquency adjudication	48%
Status offender adjudication	68%

*Geography is the single most important factor in whether a juvenile offender has legal counsel or not. In some counties, attorneys are present in fewer than 10% of juvenile cases. In most counties a substantial majority of the juveniles have no attorney. It is primarily the counties in the Twin Cities area where a majority of juveniles are represented by counsel.

¹Economic Savings/Loss include "Direct" and "Indirect" costs.

Direct Costs include: wages paid to absent employee, property damage, medical expenses, rehabilitation costs, survivor benefits, insurance premiums.

Indirect Costs include: supervisor's time, rescheduling, overtime pay, temporary replacements, re-entry or retraining, hiring permanent replacement, administrative and overhead costs for employer, loss of production.

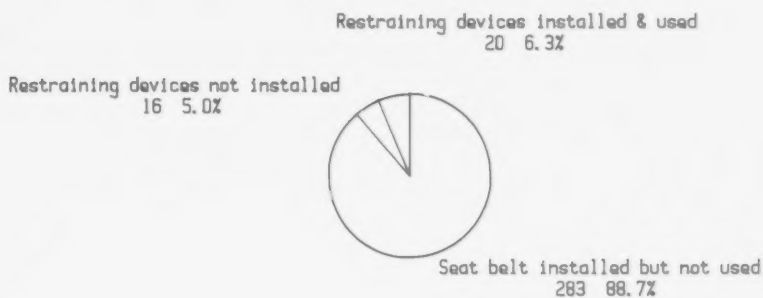

²Serious = incapacitating; Moderate = non incapacitating; Minor = possible

³1983 estimates are based on National Safety Council 1982 cost data. Estimates are thus somewhat conservative.

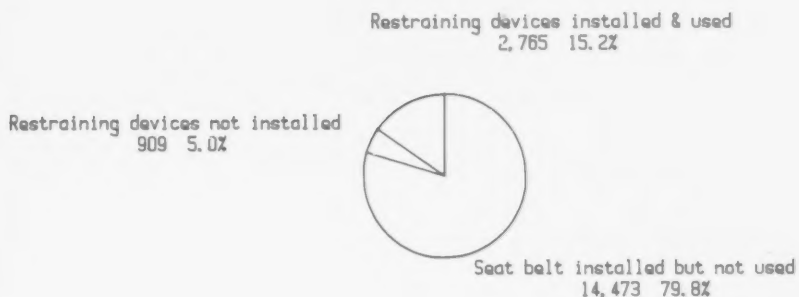

⁴MN Safety Council considers these "very conservative estimates".
